## 8 new trainees at BIKAR

On 01.08. **8 new trainees** started at BIKAR-METALLE GmbH - a **new record** for the non-ferrous metal trader from Bad Berleburg-Raumland.

All 8 newcomers complete a commercial **apprenticeship as industrial or wholesale and foreign trade clerks.**

On the first working day, in addition to the welcome by the management, the schedule included getting-to-know-you games, a company presentation and a "company scavenger hunt" through all departments.

In the coming weeks and months, the trainees will then get to know the operational processes before receiving job-specific training in the individual departments.

## EVERYTHING

with tradition

In total, the **BIKAR Group** trains more than **30 young people** at its sites in **Bad Berleburg** and **Korbußen** in Thuringia. This is of crucial importance for the metal trader, which has grown strongly in recent years, because, as **Managing Director Pascal Bikar** emphasizes, "our commitment to training young people also means securing the future of our company. We are pleased to already have the skilled workers of tomorrow in our ranks today and to be able to take them on as part of our staff once they have completed their training." An investment in the future that will certainly pay off for the company, which was founded in 1962. Several of the company's trainees have already been honored by the Chamber of Industry and Commerce as the best in their year and now occupy key positions in the company.

In recent years, BIKAR has developed into a globally active producer and trader of non-ferrous metals, in particular aluminum, copper, brass and bronze. From the Raumland and Korbußen sites, more than **400 employees** supply customers from a wide range of industries and of all sizes with semi-finished products of all kinds.
