## **BIKAR again provides best apprentices in the chamber district**

It is now well known that Bikar not only produces tons of non-ferrous metals, but also regularly has outstanding trainees. In the past, **apprentices** from Raumländer Metallhandel have repeatedly **received awards for outstanding performance at school**. Many management positions in the rapidly expanding company are now occupied by former top graduates - the two current authorized **signatories Ingo Miss and Louis Lauber** have already been honored for their results, as have **the head of payroll accounting Stefanie Althaus** and the **dual student Florian Schneider**.

The fifth in the group of exceptional exam grades is now **Lina Piosczyk** from Berghausen. She achieved the **dream mark of 98% in her final examination as a wholesale and foreign trade merchant** and thus also set an internal company record, missing only a few tenths of a point to the best examination in the country.

# EVERYTHING

with tradition

This achievement is particularly remarkable in view of the fact that Lina Piosczyk achieved this within the framework of a shortened training program, whereby she worked out parts of the subject matter herself. She was helped in this by her unbridled ambition, but also by the in-house lessons that BIKAR offers all trainees once a week. In **recognition** of her achievements, Lina Piosczyk was now presented with a **voucher for an AIDA trip** by her **trainers Ingo Miss and Marvin Braun**. The company has been offering this incentive for exceptional training performance for a long time. So for Lina Piosczyk, it's "Cast off and off to the North Cape" in August.

Unlike her predecessors in the company, the honoree decided to study full-time after her apprenticeship. She has been studying at the University of Siegen for a few weeks now, with the aim of switching sides after graduation and ensuring good grades in her future work as a vocational school teacher.

However, she will remain with her training company in another form. Starting in January, **Lina Piosczyk** will take over **internal factory teaching at BIKAR** - a win-win situation for everyone involved. She can put the knowledge she gained at university directly into practice and the company gets a committed and motivated teacher for the current trainees, so that it will be able to give away one or the other AIDA trip in the years to come.
