Precision metals, local delivery – A strong first year in Bristol for BIKAR METALS AEROSPACE

Bristol, UK – Over the past year, BIKAR METALS AEROSPACE has been manufacturing semi-finished products from aluminium and other non-ferrous metals at its Bristol facility, tailored precisely to customer specifications across the UK and Ireland. During this time, the site has grown steadily in space, capacity and skilled personnel and has established itself as a trusted partner for precision metal solutions.

Fast, tailored solutions for demanding industries

From aerospace and mechanical engineering to toolmaking and beyond, customers benefit from short lead times, high material availability and technical support tailored to their specific needs. The Bristol facility was purpose-designed to serve the local market with speed and precision. Industry-experienced specialists and sales professionals guide customers from material selection through to project completion.

A wide range of materials – precision-cut and locally delivered

As part of the German BIKAR METALS Group, the Bristol site offers access to an extensive material portfolio including aluminium, copper, brass, bronze, special alloys and plastics. These are available as plate, sheet, rod, tube, profile or custom-cut to size. With high-performance saws, automated processes and an experienced team of specialists, the facility delivers fast, precise results even for complex requirements. Additional in-house finishing services, such as protective foil application for sheet

materials, support safe handling and help preserve surface integrity during storage and transport.

A dedicated UK-based truck fleet ensures fast and flexible deliveries to customers in the region. Globally standardised secure packaging guarantees that materials arrive on time and in perfect condition every time.

By expanding its presence in the UK, BIKAR METALS AEROSPACE reaffirms its commitment to quality, customer proximity and international growth, providing local service at global standards.
