BIKAR METALS Denmark: Strong first year and trade fair success in Herning

For just over a year, the team in Odense has been part of the BIKAR Group – a family-owned metal trading company with more than 60 years of experience in sourcing and processing non-ferrous metals, headquartered in Germany. It quickly became clear that the demand in the Danish market is high. Many companies are looking for a dependable partner for precisely processed semi-finished products, and this is exactly where BIKAR METALS Denmark steps in. With a wide range of high-quality non-ferrous metals, state-of-the-art sawing technology and short delivery times, the company fills a gap in the market and helps its customers execute projects efficiently and accurately.

“We have had a fantastic, exciting start here in Denmark,” says Anders Raabjerg Jakobsen, Head of Sales at BIKAR METALS Denmark. “In our first year alone, we built many valuable customer relationships. It’s great to support Danish companies with our materials and solutions in a targeted way.”

Metal processing companies benefit from over 60 years of experience in the production and trade of plates, bars, cut-to-size materials made from aluminium, copper, bronze, brass and plastics. BIKAR offers a wide range of shapes and alloys from a single source, ensuring fast availability through its stock of over 100,000 tonnes of material. The semi-finished products are precisely cut in several fully automated cutting centres and delivered to customers by the company’s own fleet or trusted partners.

Trade fair HI Tech & Industry Scandinavia confirms: BIKAR fills market gap

By participating in HI Tech & Industry Scandinavia 2025, BIKAR METALS once again demonstrated the importance of Scandinavian customers for the long-established company. The BIKAR METALS Denmark team acted as the local point of contact on-site, accompanied by the back-office team from the German headquarters. Together, they showcased the full product and service portfolio and provided visitors with genuine added value: individual advice, in-depth material expertise and tailored solutions for the requirements of the Danish industry.

The exhibition in Herning confirmed what became evident during the first year: BIKAR METALS fills a gap in the Danish market – with quality, reliability, and a strong team working close to its customers.
