BIKAR METALS at Intec 2025: Where Innovation Meets Precision

From 11 to 14 March 2025, Leipzig became the vibrant heart of the machine tool, manufacturing and automation industry – as Intec opened its doors to experts from around the globe. The trade fair provided a stage for groundbreaking technologies, pioneering developments and valuable networking opportunities. Right at the centre of the action: BIKAR METALS, the specialist for precision semi-finished products.

With over 60 years of experience, the family-run business stands for quality, reliability and innovation. Whether aluminium, copper, brass, gunmetal, bronzes, special alloys or plastics – BIKAR METALS supplies customers worldwide with an impressive range of sheets, plates, bars, rings, circular blanks and profiles. In state-of-the-art cutting centres, these are processed to the millimetre according to individual specifications – precision that makes the difference.

The trade fair proved to be the perfect platform for BIKAR METALS to demonstrate how digital processes and innovative solutions are transforming materials trade. Over four days, the company made the most of the opportunity to strengthen existing partnerships, establish new contacts, and further consolidate its market position.

With many inspiring impressions, exciting conversations and fresh ideas in tow, BIKAR METALS looks back on a successful exhibition – and looks forward to shaping the future of the industry with the momentum gained.
