MESSAGE FROM THE EXECUTIVE MANAGEMENT

Welcome to BIKAR

For more than 60 years we have stood for quality, reliability and innovation in the world of metals. As a third-generation family business, we know sustainable success is built on strong values: a family-oriented corporate culture, consistent digitalization and innovation, and our responsibility for the environment and future generations.

Our employees are the heart of BIKAR. Their commitment and expertise drive us to explore new paths and meet the high demands of our customers worldwide. Using state-of-the-art technologies and smart processes, we actively shape the future of the industry – efficiently, sustainably and with a clear vision for tomorrow.

This press kit invites you to learn more about our company, our vision and our capabilities. We look forward to the exchange with you.

FAMILY, PROGRESS AND RESPONSIBILITY

Family-oriented Corporate Culture

BIKAR is an owner-managed family business. Family comes first here. We have a low average employee age and a young management team. Family values shape everyday working life at BIKAR. We see ourselves as the BIKAR FAMILY and are closely rooted in the regions of our production sites. We provide excellent working conditions, from ergonomic workstations in production and offices to parent-child working areas and pragmatic, individual solutions for care or support needs – just a few examples of our strong commitment to the BIKAR FAMILY.

Innovation and Digitalization

BIKAR stands out for its innovative strength and a clear focus on automation and digitalization. Our goal is to implement process automation, digitalization and optimization across all areas using the latest technologies – with the aim of simplifying and accelerating processes to meet the needs of our customers and our company.

Sustainability

At BIKAR we understand how important sustainability is. We fully acknowledge that every activity, action and decision impacts our shared environment, unique nature and the global climate – affecting present and future generations. With this awareness we act sustainably and assume social, economic and ecological responsibility.

FROM 1962 TO TODAY: OUR MILESTONES AT A GLANCE

1962
 Founded by Luise & Radomir BIKAR – trading in metal bars

1999
 First international subsidiary founded in Singapore

2005
 Opening of Plant 3 for cast plates – in-house production of plates from cast blocks

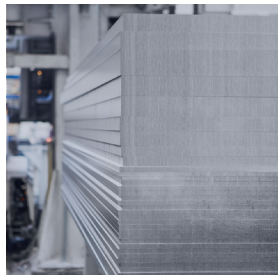

2015
 Opening of Plants 3 and 4 in Korbußen (near Gera)

2023
 Opening of the BIKAR ZONE in Bad Berleburg and an international subsidiary in Bristol, UK

1992
 Plates added to the product portfolio

2000
 Construction of Plant 2 for rolled plates – focus on automation by connecting saws to the high-bay storage

2009
 Opening of Plants 1 and 2 BIKAR ALUMINIUM GmbH in Korbußen

2019
 Establishment of BIKAR AEROSPACE

2024
 Opening of BIKAR METALS India in Belagavi, India

EVERYTHING. with tradition.

These three words sum up our philosophy: we make everything possible for our customers and our employees, and we give our all to achieve this. This tradition goes back to the company's founding by Luise & Radomir Bikar in 1962 and continues across generations. From the outset, our aim at BIKAR has been to satisfy every customer requirement. We strive to always make everything possible for them. We supply our customers with everything the market offers – out of tradition. BIKAR METALS remains a family business with a long history. On the four pillars of our company – service, delivery time, quality and price – we have built many stable customer relationships and continue to convince new customers of our strengths. Our corporate success is based on trust, honesty and fairness, cohesion and reliability. We live these values internally, in relationships with our customers and with our suppliers. **EVERYTHING. with tradition.** also guides our company development. We invest in our sites, focus on digitalization and automation, and we know that the best technology needs a strong team to deliver the desired performance.

EVERYTHING. with tradition. describes our past, present and future endeavours and actions to be a competent and reliable partner for our customers, suppliers and employees in all situations.

and 100,000 tonnes of
storage capacity

Annual turnover of
€640,000,000

Europe's largest cutting
centre with 50 pallet saws

COMPANY PROFILE

About the company

For more than 60 years the family business BIKAR has stood for quality, reliability and innovation in trading aluminium, copper, brass, red brass, bronzes, special alloys and plastics. Our customers benefit from a comprehensive stock and delivery program of sheets, plates, bars, rings, discs and profiles – worldwide. In highly automated cutting centers we manufacture semi-finished goods and cut parts precisely to customer specifications, making us one of the market's leading suppliers.

Products and Services

BIKAR offers a diverse range of materials and forms:

- **Materials:** Aluminium, copper, brass, bronze and other non-ferrous metals.
- **Forms:** Plates, round bars, tubes, profiles, rings and more.
- **Own brand:** FORMODAL® aluminium plates in various sizes and alloys.

Our fully automated production allows us to manufacture non-standard cuttings in series quality.

Locations and Global Presence

BIKAR operates internationally with 4 production sites and sales offices worldwide. Our global presence enables us to serve customers efficiently in different markets and ensure uninterrupted supply.

COMPANY PROFILE

Industries and target groups

Our products are used across a range of industries, including mechanical engineering, the automotive sector, aerospace and construction. We serve both large corporations and medium-sized enterprises and adapt our offerings flexibly to the specific needs of our customers.

Sustainability and innovation

BIKAR combines tradition with a forward-looking approach by prioritizing sustainable processes and innovative technologies. Our goal is to take ecological responsibility while maintaining the highest quality standards. By doing so, we contribute to environmental protection and create sustainable added value for our customers.
